Qualifications

- Proficiently write complicated SQL queries to extract a vast amount of data from various sources.
- Performed data manipulation using SQL to add/remove/update data as needed.
- Used Microsoft Azure and AWS technologies to work on projects.
- Collaborated with a small team to ensure our program was ready to deploy.

Experience

Work Integrated Learning - Red River College Polytech **JAN 2023 – APRIL 2023**	During my time in Project Space at Red River College Polytech, I got more insight into what it's like to work in an Agile environment with a development team and how to interact with the client. My responsibilities during this time were to ensure client's needs were being met and communicate with my team to ensure important tasks were being handled. I created a component where administrative users can import and export information via CSV file.
